

We are all antimicrobial users.

Every day, tiny superheroes known as antimicrobials are used to help kill or prevent the growth of bacteria, viruses and fungi. These good chemistries touch many aspects of our daily lives, often without us even realizing it.

You are
Anti-Germ
if:

You frequently
use antibacterial
hand soaps,
gels or foams

You wash your
dishes with
antibacterial dish soap
and disinfect
your counters

*Antimicrobials
do more than
just clean – they
disinfect and
sanitize, helping
to stop the
spread of germs
and disease.*

With the use of antimicrobials, you are doing the right thing to protect yourself and your family. Learn more at goodchemistryliveshere.com.   @GoodChemistryLH
